VOLUME 1 - 2023

VERIFIED EXTRACTIONS FROM THE SAN BERNARDINO BASIN AREA BY NON-PLAINTIFFS FOR USE WITHIN SAN BERNARDINO COUNTY FOR CALENDAR YEARS 1959-1963 & 2019-2023

INTRODUCTION

The provisions of Paragraphs V(b) and VI(c) of the Judgment in Case No. 78426 entered April 17, 1969, provide as follows:

> V(b) "The total actual average annual extractions from the San Bernardino Basin Area by entities other than Plaintiffs for use within San Bernardino County for the five-year period ending with 1963 are assumed to be 165,407 acre-feet; the correct figure shall be determined by the Watermaster as herein provided."
>
> VI(c) "San Bernardino Valley shall provide imported water for replenishment of the San Bernardino Basin Area at least equal to the amount by which extractions therefrom for use within San Bernardino County exceed during any five-year period the sum of: (a) five times the total average annual extractions determined under Paragraph V(b) hereof, adjusted as may be required by the natural safe yield of the San Bernardino Basin Area; and (b) any new conservation to which users within San Bernardino Valley are entitled. Such replenishment shall be supplied in the year following any five-year period; provided that during the first five-year period, San Bernardino Valley shall supply annual amounts on account of its obligations hereunder, and such amounts shall be not less than fifty percent of the gross amount of excess extractions in the previous year."

Compliance with these provisions of the Judgment requires an annual accounting of the total actual extractions of surface and groundwater within the San Bernardino Basin Area. Included in this Volume 1-2023 is the verified accounting of such production by non-plaintiff owners for the calendar year 2023. The verified production for the five-year base period ending with 1963 and the verified production for calendar years 2019, 2020, 2021, 2022, and 2023 are also included.

Three indexes are included which provide a cross index by owner's name, State Water Resources Control Board Well Recordation Number, and State Well Number. In addition and where known, each index shows the local designation of each well and the groundwater basin in which the well is located.

Tables No. 1 and No. 2 in this report list the individual wells by the owner for each year, the five-year base period ending in 1963, the five-year base period average, the extractions for the years 2019 through 2023, the five-year average for that period, and the owner's total annual verified extractions. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made.

Table No. 3 is a summary of the verified extractions, by owner, as presented in Tables No. 1 and No. 2.

Table No. 4 contains the total verified Lytle Creek stream diversions by Fontana Union Water Company, West Valley Water District, City of Rialto, City of San Bernardino and Mount Vernon Water Company. The total verified Lytle Creek stream diversion takes into account, and excludes, the return flow to Lytle Creek from the Fontana Power House afterbay. Plate No. 1 contains a schematic diagram of Lytle Creek facilities. Plate No. 1A contains a map showing locations of Lytle Creek facilities.

Table No. 5 contains the verification of the Mill Creek stream diversions by month. Plate No. 2 contains a schematic diagram of Mill Creek facilities. Plate No. 3A contains a map illustrating location of the Mill Creek facilities.

Table No. 6 contains the verification of the Santa Ana River stream diversions by month. Plate No. 3 contains a schematic diagram of Santa Ana River facilities. Plate No. 3A contains a map illustrating locations of Santa Ana River facilities.

Table No. 7 shows the reported diversions by entity from the major streams in San Bernardino Basin Area, namely, Lytle Creek, Mill Creek and Santa Ana River.

Table No. 8 shows the total Verified Production of ground and surface water within the San Bernardino Basin Area. Table No. 8 was modified in the Annual Report dated September 6, 2013 to show:

1. Plaintiff extractions delivered to Orange County Water District under the high groundwater mitigation agreements.
2. In-lieu water deliveries of imported water to Bear Valley Mutual Water Company (BVMWC) pursuant to the 1996 agreement with Big Bear Municipal Water District.

As presented in the Annual Report dated September 6, 2013, non-plaintiff total extractions were recalculated from 1971 forward. The results of such recalculations are shown in Table No. 2 of the Annual Report.

Table No. 8 was further modified in the August 1, 2015 Annual Report by deleting the inclusion of in-lieu water deliveries (Footnote 7) from the determination of non-plaintiff total extractions. In 2014, San Bernardino Valley delivered both imported water and

groundwater to BVMWC. Watermaster developed a new methodology to account for both types of deliveries by showing the sum of deliveries as an obligation in Table No. 17 of the Annual Report and excluding imported water deliveries from total extractions in Table No. 8.

Non-plaintiff total extractions were again recalculated from 1971 forward and such recalculations are shown in Table No. 2 of the Annual Report.

The total Verified Production (ground and surface water) from the San Bernardino Basin Area by non-plaintiff owners for the calendar year 2023, excluding minor production, is 125,037 acre-feet as shown on the last line of Table No. 8.

VOLUME 1A – 2023

CHAPTER I

PLAINTIFFS EXTRACTIONS FROM THE SAN BERNARDINO BASIN AREA FOR CALENDAR YEARS 1959–1963 & 2019–2023

The provisions of Paragraph VI(b)3 of the Judgment in Case N. 78426 entered April 17, 1969, entitled "San Bernardino Basin Area Rights and Replenishment (Annual Adjusted Rights of Plaintiffs)" provides as follows:

VI(b)3 "In any five-year period, each Plaintiff shall have the right to extract from the San Bernardino Basin Area for use in each service area designated in Table B-1 an amount of water equal to five times its adjusted right for such service area; provided, however, that extractions by each Plaintiff in any year in any service area shall not exceed such Plaintiff's adjusted right for that service area by more than 30 percent."

Compliance with this provision of the Judgment requires that an accounting of the total actual extractions of surface and groundwater by the Plaintiffs – City of Riverside, The Gage Canal Co., Meeks & Daley Water Co., Aqua Mansa Water Co., Riverside Highland Water Co., and the Regents of the University of California – from the San Bernardino Basin Area be made annually. Included in this Volume 1A – 2023 is the verified accounting of such extractions by the Plaintiffs for the calendar years 2019 through 2023. The extractions for the five-year base period ending with 1963 are also included for comparison.

Three indexes are included which provide a cross index by owner's name, State Well Number, and State Water Resources Control Board Well Recordation Number. In addition, each index shows the local designation of each well, if the file has been closed, which year that occurred, and the last five years of verified extractions and that period average.

CHAPTER II

PLAINTIFFS EXTRACTIONS FROM THE SAN BERNARDINO BASIN AREA FOR CALENDAR YEARS 1959–1963 AND 2019–2023 AND DISTRIBUTION BY SERVICE AREA

Paragraph XVI of the Judgment states:

> "The provisions of Paragraph III and V through XII of this Judgment shall be in effect from and after January 1, 1971; and remaining provisions are in effect immediately."

Thus the annual accounting provisions which relate to extractions from the San Bernardino Basin Area by Plaintiffs were not effective until January 1, 1971.

Table No. 1 shows the extractions from individual wells owned by each Plaintiff for the five calendar year period ending with 1963, the annual average for said five-year period, and the extractions for calendar years 2019 through 2023 and annual average for that period.

Table No. 2 summarizes the total annual extractions for each Plaintiff during the five-year period 1959 through 1963, the annual average for the five-year period, and the 2019 through 2023 extractions and the annual average.

Table No. 3 shows total annual extractions and its distribution of deliveries. The total annual extractions for 2023 are 49,658 acre-feet, which includes 49,096 acre-feet in Plaintiff extractions plus 562 acre-feet in water delivered from the City of San Bernardino, the Baseline Feeder, and West Valley Water District to Riverside Highland Water Company.

To facilitate the comparison of the total annual extractions as well as the portions thereof delivered within the San Bernardino Basin Area, the Colton Basin Area, and Riverside Basin Area within San Bernardino County, and to areas outside San Bernardino Valley,

four additional tables have been prepared which summarize the total annual extractions from the San Bernardino Basin Area for the period 1959 through 1963 and 2019 through 2023 for each Plaintiff, as well as the portions thereof delivered to various service areas described above.

Table No. 4 lists the Total Extractions from the San Bernardino Basin Area for each Plaintiff annually for the period 1959 through 1963 and the five-year average and calendar years 2019 through 2023.

Similar listings were made for the same period which shows the deliveries within the San Bernardino Basin Area, the deliveries to the Colton Basin Area and Riverside Basin Area within San Bernardino County, and the deliveries to areas outside San Bernardino Valley. The listings are shown on Table Nos. 5, 6, and 7, respectively.

VERIFIED EXTRACTIONS FROM THE COLTON BASIN AREA FOR CALENDAR YEARS 1959-1963 & 2019-2023

INTRODUCTION

The provisions of Paragraph VIII(a) and VIII(b) of the Judgment in Case No. 78426 entered April 17, 1969, entitled "Extractions from Colton Basin Area and Riverside Basin Area in San Bernardino County" provide as follows:

VIII(a) "The average annual extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County for use outside San Bernardino Valley for the five-year period ending with 1963 are assumed to be 3,349 acre-feet and 20,191 acre-feet, respectively, the correct figures shall be determined by the Watermaster as therein provided."

VIII(b) "Over any five-year period, there may be extracted from each such Basin Area for use outside San Bernardino Valley, without replenishment obligation, and amount equal to five times such annual average for the Basin Area; provided, however, that if extractions in any year exceed such average by more than 20 percent, Western shall provide replenishment in the following year equal to the excess extractions over such 20 percent peaking allowance."

Compliance with these provisions of the Judgment requires that an accounting of the total actual extractions of surface and groundwater within the Colton Basin Area and the Riverside Basin Area within San Bernardino County be made annually. Included in this Volume 2-2023 is the verified account of the production from the Colton Basin Area by owners for the calendar years 2019-2023. The verified production for the five-year period ending with 1963 and the five-year average is also included for comparison. The five-year average production from the Colton Basin Area ending in 1963 was verified to be 11,731 acre-feet. Three indexes are included which provide a cross index by owner's name, State Well Number, and State Water Resources Control Board Well Recordation Number. In

addition, each index shows the local designation of each well, if the file has been closed, which year that occurred, and the last five years of verified extractions and that period average.

Table Nos. 1 and 2 in this report list the individual wells by the owner for each year in the five-year base period ending in 1963, the five-year base period average, the extractions for the years 2019 through 2023, and the owner's total annual verified extractions. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made. Table No. 3 combines the wells in Table Nos. 1 and 2, and Table No. 3A is a summary of the verified extractions, by owner.

Paragraph VIII(a) of the Judgment requires that only those extractions from the Colton Basin Area which are used outside San Bernardino Valley be verified for the five calendar years ending with 1963 and accounted for annually from and after January 1, 1971.

Table No. 4 shows the extractions from the Colton Basin Area for 2019 through 2023. The verified extractions from the Colton Basin Area are as follows:

VOLUME 3 – 2023

VERIFIED EXTRACTIONS FROM THE RIVERSIDE BASIN AREA WITHIN SAN BERNARDINO COUNTY FOR CALENDAR YEARS 1959–1963 & 2019–2023

INTRODUCTION

The provisions of Paragraph VIII(a) and VIII(b) of the Judgment in Case No. 78426 entered April 17, 1969, entitled "Extractions from Colton Basin Area and Riverside Basin Area in San Bernardino County" provide as follows:

VIII(a) "The average annual extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County for use outside San Bernardino Valley for the five-year period ending with 1963 are assumed to be 3,349 acre-feet and 20,191 acre-feet, respectively, the correct figures shall be determined by the Watermaster as therein provided."

VIII(b) "Over any five-year period, there may be extracted from each such Basin Area for use outside San Bernardino Valley, without replenishment obligation, and amount equal to five times such annual average for the Basin Area; provided, however, that if extractions in any year exceed such average by more than 20 percent, Western shall provide replenishment in the following year equal to the excess extractions over such 20 percent peaking allowance."

Compliance with these provisions of the Judgment requires that an accounting of the total actual extractions of surface and groundwater within the Colton Basin Area and the Riverside Basin Area within San Bernardino County be made annually. Included in this Volume 3 – 2023 is the verified account of the production from the Riverside Basin Area within San Bernardino County by owners for the calendar years 2019–2023. The verified production for the five-year period ending with 1963 and the five-year average is also included for comparison. The five-year average production from the Riverside Basin Area within San Bernardino County ending in 1963 was verified to be 33,729 acre-feet. Three indexes are included which provide a cross index by owner's name, State Well Number,

and State Water Resources Control Board Well Recordation Number. In addition, each index shows the local designation of each well, if the file has been closed, which year that occurred, and the last five-years of verified extractions and that period average.

Table Nos. 1 and 2 in this report list the individual wells by the owner for each year in the five-year base period ending in 1963, the five-year base period average, the extractions for the years 2019 through 2023, and the owner's total annual verified extractions. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made. Table No. 3 combines the wells in Table Nos. 1 and 2, and Table No. 3A is a summary of the verified extractions, by owner.

Paragraph VIII(a) of the Judgment requires that only those extractions from the Riverside Basin Area within San Bernardino County be verified for the five calendar years ending with 1963 and accounted for annually from and after January 1, 1971.

Table No. 4 shows the extractions by the Riverside County Entities from the Riverside Basin Area within San Bernardino County for 2019 through 2023.

Table No. 5 shows the Base Period Average extractions from the Riverside Basin Area within San Bernardino County for the five calendar years ending in 1963. Such extractions averaged 24,120 acre-feet for said five-year period of which 21,085 acre-feet were delivered outside of San Bernardino Valley. Table No. 5 also shows the verified extractions for calendar years 2019 through the current year. The verified extractions by Riverside County Entities for 2023 have been determined to be 9,581 acre-feet of which 9,057 acre-feet were delivered outside San Bernardino Valley as shown on Table No. 5.

The verified extractions from the Riverside Basin Area within San Bernardino County are as follows:

VERIFIED EXTRACTIONS FROM THE RIVERSIDE BASIN AREA WITHIN RIVERSIDE COUNTY FOR CALENDAR YEARS 1959-1963 & 2019-2023

INTRODUCTION

The provisions of Paragraph IX(a) and IX(b) of the Judgment in Case No. 78426 entered April 17, 1969, entitled "Extractions from the Portion of Riverside Basin Area in Riverside County which is Tributary to Riverside Narrows" provide as follows:

IX(a) "The average annual extractions from the portion of the Riverside Basin Area in Riverside County, which is tributary to Riverside Narrows, for use in Riverside County, for the five-year period ending with 1963 are assumed to be 30,044 acre-feet and 20,191 acre-feet; the correct figures shall be determined by the Watermaster as therein provided."

IX(b) "Over any five-year period, there may be extracted from each such Basin Area, without replenishment obligation, and amount equal to five times such annual average for the Basin Area; provided, however, that if extractions in any year exceed such average by more than 20 percent, Western shall provide replenishment in the following year equal to the excess extractions over such 20 percent peaking allowance."

Paragraph IX(a) of the Judgment requires only that the extractions from that part of the Riverside Basin within Riverside County which is tributary to the Riverside Narrows and used in Riverside County, be verified for the five calendar year base period ending in 1963 and accounted for annually from and after January 1, 1971. Accordingly, a verification of these extractions was made, the results of which are shown in Table No. 3 and averaged 29,633 acre-feet for the five-year period ending with 1963.

Table Nos. 1 and 2 in this report list the individual wells by the owner for each year in the five-year base period ending in 1963, the five-year base period average, the extractions

for the years 2019 through 2023, and the owner's total annual verified extractions. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made. Table No. 3 combines the wells in Table Nos. 1 and 2, and Table No. 3A is a summary of the verified extractions by owner.

Table No. 4 shows the extractions from the Riverside Basin Area within Riverside County for 2019 through 2023.

DISTRIBUTION OF EXTRACTIONS

The distribution of the verified extractions by the Plaintiffs and Riverside County entities from the San Bernardino Basin Area, Colton Basin Area, and Riverside Basin Area for the five calendar years ending with 1963 and the ensuing years 1964 through 1970 was presented in the Report of Watermaster, Volume 5, dated June 1972. That volume also included the distribution of extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County made by San Bernardino County entities for the five calendar years ending with 1963 and the year of 1970.

The distribution of extractions in calendar years 1971, 1972, and 1973 was presented in separate reports as updates to the original Volume 5 dated June 1972. Changes in the distribution systems of the various water entities during the period 1971 through 1973, necessitated several revisions of the original Volume 5. Therefore, Volume 5 for calendar year 1974 was completely revised and updated to reflect these changes. As a result Volume 5 dated August 1976 now represents the most recent complete report on distribution of extractions including descriptions of each water system.

From the August 1976 report to the report dated August 2018, the basic structure of Volume 5 had not changed. As changes happened throughout the basin areas, tables were revised and updated, or new tables were created to reflect the changes.

This report, Volume 5-2023 shows the distribution of extractions for the most recent five-year period ending in 2023 and is supplementary to the Volumes 5 dated August 1976 and August 2018. Detailed computations and tables are used to show the distribution of extractions from Colton and Riverside Basin Areas by both Riverside and San Bernardino County entities and the Plaintiffs' extractions from the San Bernardino Basin Area.

VERIFIED EXTRACTIONS FROM THE SAN BERNARDINO BASE AREA, COLTON BASIN AREA, AND RIVERSIDE BASIN AREA FOR USE WITHIN WESTERN ON LANDS NOT TRIBUTARY TO THE RIVERSIDE NARROWS

The extractions from the San Bernardino, Colton, and Riverside Basin Areas for use within Western Municipal Water District (Western) on lands not tributary to the Riverside Narrows have been verified for the five-year base period ending in 1963.

The resulting five-year annual average was determined to be 42,535 acre-feet, as shown in Table No. 12 of Chapter VII of the Annual Report of the Western-San Bernardino Watermaster for Calendar Year 1971. A detailed report on the verification for the five-year base period 1959-1963, and for the ensuing years 1964-1970, is contained the Report of Watermaster, Volume 6, dated June 1972.

The extractions from the above-mentioned basin areas for the calendar years 1971 through 2023, which were delivered within Western for use on lands not tributary to the Riverside Narrows, have been verified by the Watermaster as follows:

CREDIT FOR RETURN FLOW RESULTING FROM DELIVERY OF IMPORTED WATER IN AREAS TRIBUTARY TO THE RIVERSIDE NARROWS

Pursuant to Judgment Paragraph XI(b)3, Western received credit against any future replenishment obligations for any return flow from imported water used in Riverside County which contributes to base flow at Riverside Narrows. In addition, Judgment Paragraph XI(a) provides that the credit for return flow will be the calculated amount of return flow adjusted upward or downward depending on the quality (TDS) of the return flow, using the same quality adjustment formula used at Riverside Narrows in the Stipulated Judgment in the case of Orange County Water District v. City of Chino, et al., Case No. 117628-County of Orange.

There are currently two methods to deliver imported water to areas tributary to the Riverside Narrows in Riverside County.

1. Direct delivery to Western's retail service area and to the City of Riverside (WR-24C) of water from the Henry J. Mills Treatment Plant (Mills Plant) which treats State Water Project water.
2. Delivery to Western, or any Plaintiff party, of groundwater from the San Bernardino Basin Area pursuant to the 2004 Judgment Paragraph VI(b)6 Agreement that provides for 6,000 acre-feet of additional water extraction in exchange for Western's purchase of a like amount of recharge water.

Volume 6, Table No. 7, shows the return flow from imported water delivery by both Western and the City of Riverside to areas tributary to the Riverside Narrows for the current five-year period. Water quality adjustments have been made in the table. The following information is intended to complement Table No. 7 data and help the reader understand its mechanics.

The table row titled *Total Deliveries of Imported Water* lists the sum of all imported water

delivered directly to Western and the City of Riverside within areas tributary to the Riverside Narrows. Pursuant to the 2004 Judgment Paragraph VI(b)6 Agreement that provides for additional water extractions in the San Bernardino Basin Area in exchange for Western's purchase of a like amount of imported recharge water, when applicable, *Imported Water Recharge in and Extracted from the San Bernardino Basin Area* is added to the *Total Deliveries of Imported Water*.

Imported Water Return Flow Tributary to Narrows is calculated as thirty-six (36) percent of *Total Deliveries of Imported Water* to areas tributary to the Riverside Narrows.

Western and the City of Riverside receive direct delivery of imported water through Metropolitan Water District's Mills Plant on Alessandro Boulevard in Riverside. The TDS levels at the Mills Plant are listed for each calendar year on the row titled *TDS of Delivered Water (mg/L)*. This information is used in the calculation to determine the *TDS of Return Flow from Delivered Water (mg/L)* and the *Amount of Adjustment Based on Quality of Imported Water.*

Calculating the TDS of Return Flow from Delivered Water

For the purposes of calculating the *TDS of Return Flow from Delivered Water*, it is assumed that sixty-five (65) percent of *Total Deliveries of Imported Water* is applied to the land in areas tributary to the Riverside Narrows. 65 percent is considered reasonable by the Western-San Bernardino Watermaster based on analysis of actual customer water use in Western's retail water service area. To complete the determination of the concentration of salts in return flows to the Narrows, the ratio of *Total Deliveries of Imported Water* to *Imported Water Return Flow Tributary to Narrows* is multiplied by the *TDS of Delivered Water (mg/L).*

The formula used is:

Salt in Water Applied Outdoors = Salt in Return Flow

TDS of Return Flow from Delivered Water (mg/L) =

$$\frac{\textit{(0.65 * Total Deliveries of Imported Water * TDS of Delivered Water)}}{\textit{Imported Water Return Flow Tributary to Narrows}}$$

Calculating Amount of Adjustment Based on Quality of Imported Water

The calculation of the *TDS of Return Flow from Delivered Water (mg/L)* can result in three scenarios:

1. TDS value greater than 700 mg/L
2. TDS value greater that 600 mg/L but less than 700 mg/L
3. TDS value less than 600 mg/L

A TDS value greater than 700 mg/L will result in a debit that is subtracted from the *Imported Water Return Flow Tributary to Narrows*. A TDS value greater than 600 mg/L but less than 700 mg/L will result in neither a credit being added to nor a debit being subtracted from the *Imported Water Return Flow Tributary to Narrows.* A TDS value less than 600 mg/L will result in a credit that is added to the *Imported Water Return Flow Tributary to Narrows.*

The formula for the *Amount of Adjustment Based on Quality of Imported Water* is:

If the TDS is:	**Then the *Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows is determined by the formula below***
Greater than 700	11 * (*Imported Water Return Flow Tributary to Narrows*) * (TDS-700) / 15,250
600 to 700	*Imported Water Return Flow Tributary to Narrows*
Less than 600	11 * (*Imported Water Return Flow Tributary to Narrows*) * (600-TDS) / 15,250

The *Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows* is shown on the bottom line of Table No. 7.

INTRODUCTION

The settlement of the case of the Orange County Water District, Plaintiff, vs. City of Chino, et al., Defendants, being Case No. 117628 in the Superior Court of the State of California in and for the County of Orange, necessitated a settlement of the case of Western Municipal Water District, et al., Plaintiffs, vs. East San Bernardino County Water District, et al., Defendants, which was settled by Stipulated Judgment in Case No. 78426, entered in the Superior Court of the State of California in and for the County of Riverside, on April 17, 1969. Such Judgment was amended on February 28, 1992.

Paragraph X of the original Judgment, titled, "Replenishment to Offset New Exports of Water to Areas Not Tributary to the Riverside Narrows" recites as follows:

> "Certain average annual amounts of water extracted from the San Bernardino Basin Area and the area downstream therefrom to Riverside Narrows during the five year period ending in 1963 have been exported for use outside of the area tributary to Riverside Narrows …"
>
> "San Bernardino Valley shall be obligated to provide replenishment for any increase over the exports from San Bernardino Valley for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster …"

Pursuant to the foregoing instructions, the Watermaster conducted an investigation of water produced within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley and delivered to lands not within Western nor tributary to the Riverside Narrows. The results of this investigation which included the five-year base period 1959-1963 as well as the verified production for the Calendar Years 1970 and 1971 were embodied in Report of Watermaster, Volume 7 - Base Period 1959-1963 and 1970-1971, dated February, 1973.

During the verification of the extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley for the Calendar Year 1973, the amounts previously verified for the base period (calendar years) 1959-1963 were revised. The revised verified amounts for the base period 1959-1963 are shown on Table A of this report in Section I, Chapter I. The verified amounts for calendar years 2019-2023 are shown on Table B of this volume in Section I, Chapter I. Procedures and basic data used in preparation of Tables A and B are contained in Section I, Chapters I and II, of this report.

In Section I, pursuant to the original Judgment, the combined New Export from both San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley is

determined. Under this approach, all New Export resulted in an obligation to replenish in the San Bernardino Basin Area even though some of the exported extractions were from the Colton Basin Area within San Bernardino Valley. Another approach was developed in 2013 to address this matter and partially implement the 1992 Amendment.

The 1992 Amendment included several changes that affect the methods that Watermaster uses to account for New Export. First, the second reference to San Bernardino Valley in the second quotation above was changed to San Bernardino Basin Area and new provisions for the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County were added later in the paragraph. Replenishment obligations for San Bernardino Valley pursuant to the 1992 amended Paragraph X are as follows:

> "… San Bernardino Valley shall be obligated to provide replenishment for any increase over the exports from the San Bernardino Basin Area for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster, or for any exports from the San Bernardino Basin Area for use in the Yucaipa, San Timoteo, Oak Glen and Beaumont Basins. San Bernardino Valley shall also be obligated to provide replenishment in the Colton or Riverside Basin, as the case may be, to offset loss of return flow related to any increase over the exports therefrom within San Bernardino Valley for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster. Against its replenishment obligation to offset loss of return flow related to any increase in the exports from the Colton Basin Area or Riverside Basin Area within San Bernardino Valley, San Bernardino Valley shall receive credit for that portion of direct delivered water which originated outside that Basin and which returns to the ground water of that Basin." (underline indicates changes and additions to the original Judgment.)

Pursuant to the 1992 Amendment, Section II provides data which allows determination of only the New Export from the San Bernardino Basin Area to the Chino Basin in Table No. 15A of the Annual Report. Such determination is accomplished by using the data developed in Section I along with data in other data volumes.

The verified amounts exported from only the San Bernardino Basin Area to the Chino Basin for the base period 1959-1963 are shown in Table C of this report. The verified amounts for calendar years 2019-2023 are shown in Table D of this report.

Procedures and basic data used in preparation of Tables C and D are contained in Section II, Chapter III, of this report.

The 1992 Amendment included new provisions related to accounting for the export to Chino Basin of extractions from the Colton and Riverside Basins. Such provisions require

a determination of the credit in those Basins resulting from the delivery of extractions from the San Bernardino Basin Area. The specific language in Paragraph X of the amended Judgment requiring these determinations is:

> "… San Bernardino Valley shall receive credit for that portion of direct delivered water which originated outside that Basin (Colton Basin Area within San Bernardino Valley or Riverside Basin Area within San Bernardino County) and which returns to the ground water of that Basin (Colton Basin Area within San Bernardino Valley or Riverside Basin Area within San Bernardino County)." (emphasis and parenthetical note added)

This 1992 Amendment provides that San Bernardino Valley will receive credit against any obligations in the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County for the return flow resulting from the delivery to such Basin Areas of extractions that originate outside the Basins. Such deliveries from the San Bernardino Basin Area to the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County are accounted for in Section III. Such accounting was performed to eventually be able to credit San Bernardino Valley obligations in the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County as required by the 1992 Amendment and to maintain hydrologic integrity in the San Bernardino Basin Area as referenced in Watermaster documents that supported the 1992 Amendment. Hydrologic integrity of the San Bernardino Basin Area is maintained by excluding from determinations of credits and obligations the return flow resulting from Basin extractions that are used anywhere outside the Basin. Any increase in deliveries of San Bernardino Basin Area extractions, relative to the base period, to the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County is now referred to as New Deliveries.

Section III provides data which allows determination of New Deliveries from the San Bernardino Basin Area for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County utilizing the data developed in Section II along with data in other data volumes of the Annual Report.

The verified extractions from the San Bernardino Basin Area delivered for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County for the base period 1959-1963 are shown in Table E of this report. The verified amounts for calendar years 2019-2023 are shown in Table F of this report.

Procedures and basic data used in preparation of Tables E and F are contained in Section III, Chapter IV, of this report.

Section IV provides data which allows determination of Loss of Return Flow from the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San

Bernardino County utilizing data developed in prior sections and other Volumes of the Annual Report.

Determination of Increased Return Flow to the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County utilizing data developed in prior sections and other Volumes of the Annual Report is also made.

Section V verifies deliveries of State Water Project water to San Bernardino Valley by type and place of use.

The verified amounts of State Water Project water delivered within the San Bernardino Basin Area and its uses are shown in Chapter IX of this report in Table Nos. 21 and 22.

COMBINED EXPORTS FROM THE SAN BERNARDINO BASIN AREA AND COLTON BASIN AREA WITHIN SAN BERNARDINO VALLEY FOR USE ON LANDS NOT WITHIN WESTERN NOR TRIBUTARY TO THE RIVERSIDE NARROWS

CHAPTER I

DELIVERIES TO CHINO BASIN

The verified amounts set forth in this Chapter pertain solely to those extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley for use on lands situated within the Chino Basin.

The entities delivering water to this area include Fontana Union Water Company, West Valley Water District and the City of Rialto. Maps Nos. 1, 2 and 3 included herein delineate the boundaries of the three agencies respectively, and also show the lands within each agency which are not within Western nor tributary to the Riverside Narrows. For purposes of this determination such lands are considered as lying northerly of the groundwater divide separating the Riverside and Chino Basins and westerly of the Rialto-Colton Fault. The verified amounts for the base period 1959-1963 are shown in Table A of this report. The verified amounts for calendar years 2019-2023 are shown in Table B.

Deliveries to these areas within each agency have been determined as follows:

FONTANA UNION WATER COMPANY

The lands served by the Fontana Union Water Company which include the San Gabriel Valley Water Company and which are not within Western nor tributary to the Riverside Narrows are shown on Map No. 1. The location of wells and surface diversion facilities which produce water delivered to said lands are also shown.

The total production from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley available for use on the nontributary lands have been determined by the sum of the following:

1. Production from Fontana Union Water Company wells situated within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley as reported and verified in Recordation Filings with the Watermaster with the exception that two wells situated on the Lytle Creek stream channel at Miller Narrows deliver water into the Lytle Creek powerhouse penstock. This water has been commingled with surface production.

2. Deliveries to Fontana Union Water Company's "Breedline" measured at the Fontana Powerhouse forebay Weir No. 4 and adjusted for deliveries to the Breedline from Fontana Union Water Company Well No. 27.

3. Deliveries to the Fontana Union Water Company measured at their 20 foot weir diverting from the Fontana Powerhouse afterbay plus diversions from the afterbay for delivery to City of Rialto and CEMEX Rock Company.

The Item 3 deliveries to Fontana Union Water Company reckoned at the Fontana Powerhouse 20' Weir were measured by Fontana Union Water Company and the United States Geological Survey. Since United States Geological Survey measurements were based on data obtained by continuous stage recorder as opposed to instantaneous measurements by Fontana Union Water Company two to three times daily, the United States Geological Survey data were used for purposes of the determinations contained in this report. In addition to surface diversions from Lytle Creek, the United States Geological Survey data also include an undetermined amount of water produced by the Miller Narrows Wells and may from time to time also include water obtained by temporary arrangements with other agencies diverting from the Fontana Powerhouse afterbay. For these reasons, the amounts used by the Watermaster are for purposes of this report only (i.e. deliveries to Chino Basin) and are not to be construed as a Watermaster verification of the total production by Fontana Union Water Company from either San Bernardino Basin Area or Colton Basin Area within San Bernardino Valley.

In order to determine the net deliveries to the nontributary area (Chino Basin), the total was adjusted for deliveries to tributary areas as follows:

1. Deliveries to the City of San Bernardino from Fontana Union Water Company Well No. 1, reported by Fontana Union Water Company as total production of this well.

2. Water delivered to the Owl Service Rock Company and its successor Cemex located within the San Bernardino Basin Area as reported by Fontana Union Water Company and Cemex.

3. Water delivered for use on citrus groves situated within the Colton Basin Area within San Bernardino Valley as reported by Fontana Union Water Company.

4. Water delivered to City of Rialto through West Valley Water District diversion facilities at Fontana Powerhouse afterbay.

The components of production and delivery by the Fontana Union Water Company for the base period 1959-1963 and calendar years 2019-2023, together with the indicated deliveries to Chino Basin, are summarized in Table No. 1.

WEST VALLEY WATER DISTRICT

The lands served by the West Valley Water District which are not within Western nor tributary to the Riverside Narrows are delineated on Map No. 2. Water delivered to said area was obtained from wells located within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley and surface diversions from Lytle Creek. In addition, these lands also received water extracted from wells within the Chino Basin.

The total deliveries to the nontributary area (Chino Basin) were based on the actual metered deliveries obtained from the records of the West Valley Water District. Since a portion of this water was supplied by wells located within the nontributary area, the total deliveries were reduced by the amount supplied by said wells. West Valley Water District reports that the production from these wells is used wholly within the Chino Basin. Subsequent to the base period 1959-1963, West Valley Water District records also include the Domestic and Commercial deliveries as determined from the meter books covering the nontributary area. These metered areas are also shown on Map No. 2.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years and then supplied revised determinations of the amounts delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The corrected determinations for calendar years 2008 through 2014 may be found in the Appendix B of the Appendices volume to the Annual Report of the Watermaster for calendar year 2023.

During Calendar year 2022, Marygold Mutual Water Company requested supplemental water from San Bernardino Valley to meet the needs of the shareholders within its service area. Marygold Mutual Water Company is bounded by San Bernardino Avenue, Cedar Avenue, Interstate 10, and Sierra Avenue in Chino Basin area within San Bernardino Valley. San Bernardino Valley agreed to provide supplemental State Water Project water for use in Marygold Mutual Water Company's service area. The agreement provides for Marygold Mutual Water Company to purchase State Water Project water that is treated at West Valley Water District's Oliver P. Roemer Water Treatment Plant. The treated water is then conveyed through the West Valley Water District's distribution system to an existing connection for delivery to Marygold Mutual Water Company's distribution system. Volume 7 on Table No. 2 contains the adjustment of the amounts of deliveries of water by West Valley Water District in Chino Basin illustrating the delivery of supplemental, State Water Project water to Marygold Mutual Water Company. Table No. 21 of this Volume 7 includes the amounts of water delivered to Marygold Mutual Water Company in the column titled: *Direct Deliveries Outside San Bernardino Basin Area*.

The annual deliveries to nontributary areas by the West Valley Water District for the base period 1959-1963 and calendar years 2019-2023 are summarized in Table No. 2.

CITY OF RIALTO

The lands served by the City of Rialto which are not within Western nor tributary to the Riverside Narrows are delineated on Map No. 3. Water delivered to the City was produced from wells within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley and surface diversions from Lytle Creek. In addition, the City also receives water extracted from wells within the Chino Basin.

The production records and records of water purchased together with records of metered customer deliveries are furnished by the City of Rialto.

The total water production delivered into the City's system has been determined as follows:

1. Production from City of Rialto wells situated within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley as reported in Recordation Filings with the Watermaster and verified from records furnished by the City.

2. Surface water diverted at Fontana Powerhouse afterbay and delivered to City of Rialto determined from City Records.

3. Water purchased by City of Rialto as determined from City Records.

4. Water produced in Chino Basin and delivered into City's system from Recordation Filing to the Watermaster and City of Rialto records. Such water is produced from Well Recordation No. 3602270 and during the base period 1959-1963 was used solely for agricultural purposes in the Chino Basin. From 1966 to date this well delivered water into the City's domestic system and is considered to be used wholly within the Chino Basin. City of Rialto constructed two additional wells, recordation numbers 3603175 and 3603537, located in Chino Basin. The extractions from these wells are included in the Chino Basin extractions.

Based on metered deliveries, it was determined that the percentage of total production delivered to Chino Basin was about 18 percent as compared to the 28 percent used during the initial verification. The total production delivered to Chino Basin during the base period 1959-1963 was revised accordingly, and beginning in 1971 the actual metered deliveries were used. The amount delivered to the Chino Basin was reduced by the total verified production within Chino Basin as set forth in Item (4) above, assuming that such production was used entirely within the Chino Basin as reported by the City. The remaining amount was considered representative of the total production from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley exported to the Chino Basin by the City of Rialto.

Since the sewage effluent from the City Sewage Treatment Plant accrues to the Santa Ana River above the Riverside Narrows, the total exports were adjusted to reflect this return flow. Such adjustment was based on a percentage estimated at 32 percent for the year 1959 and increasing on a straight line basis to 40 percent in 1963. This assumption was predicated on the date of construction of the treatment plant and the gradual conversion of individual septic tanks and cesspools to the sewage system.

Analysis of the production and sewage plant effluent discharge data indicates an average effluent discharge from water exported to Chino Basin of about 39 percent for the calendar year 2001. This amount is weighted to account for the domestic, agricultural and industrial deliveries through the City's domestic system and the difference in sewage return flow accruing from such uses.

In May of 2009, these calculations were revisited. A detailed review of water sales records was made and production was calculated by water use types in each of the overlying meter book areas, with adjustments made to follow the defined Chino Basin boundaries. A review of March 2005 water use (above normal rainfall period) was used to determine indoor/sewered flow vs. outdoor use. These numbers appear on Table 3, columns (9) and (12).

The annual deliveries to nontributary areas for the base period 1959-1963 and calendar years 2019-2023 are summarized in Table No. 3.

CHAPTER II

DELIVERIES TO AREAS OTHER THAN CHINO BASIN

Paragraph X of the Judgment also provides for replenishment by San Bernardino Valley to the extent exports are made from the San Bernardino Basin Area for use in the Yucaipa, San Timoteo, Oak Glen and Beaumont Basins.

The results of the initial verification of production from the San Bernardino Basin Area indicated that such exports were not made during the base period 1959-1963 nor prior to calendar year 1979.

During 1978, San Bernardino Valley constructed the Mill Creek Pipeline to convey water from the Southern California Edison Company Mill Creek #2/#3 Powerhouse afterbay to the Yucaipa Regional Park. As shown on Table 4, the pipeline was used extensively.

During 1987, San Bernardino Valley Municipal Water District completed construction of the "Yucaipa Pipeline" which can convey Mill Creek waters from the San Bernardino Basin Area to the Yucaipa Basin. Yucaipa Regional Park historically received Mill Creek water which was used for maintenance of the reservoir levels, irrigation of the Park and limited spreading for recharge of the Yucaipa Groundwater Basin. Mill Creek water was also delivered into Wilson Creek Spreading Basins for recharge into Yucaipa Groundwater Basin. The location of the Yucaipa Pipeline, Yucaipa Regional Park, and Wilson Creek Spreading Basins are shown on Map No. 4 which is included herein.

During 2003, the California Department of Water Resources completed the East Branch Extension Phase I project. This project included facilities to provide delivery of State Water Project water to Yucaipa Valley within San Bernardino Valley and to the San Gorgonio Pass Water Agency. Since completion of the East Branch Extension Phase I project, State Water Project water has been delivered to the Yucaipa Regional Park, Yucaipa Valley Water District Regional Filtration Facility, spreading basins at Oak Glen and Wilson Creek as well as San Timoteo and Beaumont Basins.

During calendar year 2008, San Bernardino Valley Municipal Water District completed construction of portions of its Central Feeder Groundwater Banking/Conjunctive Use Project. The initial portions of the Central Feeder included the Redlands Pump Station, several miles of the Central Feeder Pipeline and a connection to The Metropolitan Water District of Southern California Inland Feeder Project. The Central Feeder Project has many uses including high groundwater mitigation, distribution of water throughout the San Bernardino Basin Area and the San Bernardino Valley in addition to its groundwater banking and conjunctive use concepts. During calendar year 2008, testing of the project included pumping 102 acre feet of water that had been extracted from wells in the San Bernardino Basin Area into The Metropolitan Water District of Southern California Inland

Feeder Project. The water that was pumped to test the Central Feeder project facilities was delivered into Inland Feeder Project and for the most part was conveyed through the Inland Feeder Project to Diamond Valley Reservoir. In this instance, the 102 acre feet of test water pumped in 2008, the ultimate fate of the water pumped was not prescribed. The Metropolitan Water District of Southern California distributed the water at its discretion. Under the terms of this Judgment and the previously described circumstances, the 102 acre feet of water used to test the facilities should be considered as having been delivered to areas "… not within Western nor tributary to the Riverside Narrows…" Accordingly, the 102 acre feet amount has been shown in Table No. 4. A similar test took place in 2022 that delivered water to Devil Canyon Afterbay Number 2 and is shown in Table No. 4.

SECTION II

EXPORTS FROM THE SAN BERNARDINO BASIN AREA FOR USE ON LANDS NOT WITHIN WESTERN NOR TRIBUTARY TO THE RIVERSIDE NARROWS

CHAPTER III

DELIVERIES TO CHINO BASIN FROM THE SAN BERNARDINO BASIN AREA

In Section II the deliveries to Chino Basin from the San Bernardino Basin Area are determined.

The verified amounts for the base period 1959-1963 are shown in Table C of this report. The verified amounts for calendar years 2019-2023 are shown in Table D. These amounts were determined using data from Section I along with data from other data volumes. Fontana Union Water Company, West Valley Water District and City of Rialto deliver water to areas within Chino Basin. For Fontana Union Water Company, adequate data is contained in Table No. 1 to determine the quantities of water exported from the San Bernardino Basin Area to Chino Basin during the base period 1959-1963 and for calendar year 1971 to present. West Valley Water District has sources of supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County, and State Water Project water which is treated at the Oliver P. Roemer Water Filtration Facility. A pro-rata share of West Valley Water District's total supply was determined to be produced in the San Bernardino Basin Area and delivered to the Chino Basin. City of Rialto has sources of supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County, and State Water Project water. The City has also historically purchased water from others prior to availability of water from the San Bernardino Valley Municipal Water District's Baseline Feeder whose source of water is in the San Bernardino Basin Area. A pro-rata share of City of Rialto's total supply was determined to be produced in the San Bernardino Basin Area and delivered to the Chino Basin. Details of individual agency calculations are discussed in the following portions of the report and are shown on Table Nos. 5, 6 and 7. The verified amounts for the base period 1959-1963 are shown in Table C of this report. The verified amounts for calendar years 2019-2023 are shown in Table D.

FONTANA UNION WATER COMPANY

During the base period 1959-1963, Fontana Union Water Company produced water from the San Bernardino Basin Area and the Colton Basin Area within San Bernardino Valley. Using data from Table No. 1, Table No. 5 shows extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley during the base period 1959-1963. It also shows deliveries made in the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley. Using these data, an average annual quantity of water exported from the San Bernardino Basin Area to the Chino Basin was determined for the base period 1959-1963.

Using data from Table No. 1, Table No. 5 also shows extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley during calendar years 2019-2023. It also shows deliveries made in the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley as provided by Fontana Union Water Company. Using these data, an average annual quantity of water exported from the San Bernardino Basin Area to the Chino Basin was determined for calendar years 2019-2023.

* Fontana Water Company delivers water extracted from San Bernardino Basin Area and Colton Basin Area as Fontana Union Water Company. The Fontana Water Company water service area is located largely within Chino Basin. However, portions of the Fontana Water Company service area are within Colton Basin Area. Records of deliveries within the Colton Basin Area have recently become available to the Watermaster and will be incorporated in the Watermaster report for calendar year 2024.

WEST VALLEY WATER DISTRICT

During the base period 1959-1963, West Valley Water District produced water from the San Bernardino Basin Area, the Colton Basin Area within San Bernardino Valley and the Riverside Basin Area within San Bernardino County for export to Chino Basin. Table No. 6 shows Total Extractions/Supply from the San Bernardino Basin Area, the Colton Basin Area within San Bernardino Valley and the Riverside Basin Area within San Bernardino County during the base period 1959-1963. From these values, the percentage of West Valley Water District's water produced from the San Bernardino Basin Area was determined. That percentage was applied to the total West Valley Water District deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin for each year. An average annual quantity was determined for the base period 1959-1963.

Table No. 6 also shows Total Extractions/Supply from the San Bernardino Basin Area, the Colton Basin Area within San Bernardino Valley, the Riverside Basin Area within San Bernardino County, and State Water Project water during calendar years 2019-2023. From these values, the percentage of West Valley Water District's water produced from the San Bernardino Basin Area was determined for each year. That percentage was applied to the total West Valley Water District deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin in each year. An average annual quantity was determined for calendar years 2019-2023.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years and then supplied revised determinations of the amounts delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The corrected determinations for calendar years 2008 through 2014 may be found in the Appendix B of the Appendices volume to the Annual Report of the Watermaster.

During the base period 1959-1963, City of Rialto produced water from the San Bernardino Basin Area and the Colton Basin Area within San Bernardino Valley for export to Chino Basin. Table No. 7 shows Total Extractions/Supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County and State Water Project water during the base period 1959-1963. From these values, the percentage of City of Rialto's water produced from the San Bernardino Basin Area was determined. That percentage was applied to the total City of Rialto deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin for each year. An average annual quantity was determined for the base period 1959-1963.

Table No. 7 also shows Total Extractions/Supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County, and State Water Project water during calendar years 2019-2023. From these values, the percentage of City of Rialto's water produced from the San Bernardino Basin Area was determined for each year. That percentage was applied to the total City of Rialto deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin in each year. An average annual quantity was determined for calendar years 2019-2023.

Table No. 9 also shows Total Extractions from the San Bernardino Basin Area, deliveries in the San Bernardino Basin Area, and deliveries to Chino Basin from Table No. 6 during calendar years 2019-2023. From these values, West Valley Water District's deliveries for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County were determined for each year. An average annual quantity was determined for calendar years 2019-2023.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years and then supplied revised determinations of the amounts delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The corrected determinations for calendar years 2008 through 2014 may be found in the Appendix B of the Appendices volume to the Annual Report of the Watermaster.

WEST VALLEY WATER DISTRICT

During the base period 1959-1963, West Valley Water District produced water from the Colton Basin Area within San Bernardino Valley. Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; and Table No. 2, Table No. 15 shows extractions from the Colton Basin Area within San Bernardino Valley during the base period 1959-1963. It also shows deliveries for use on lands not within Western nor tributary to the Riverside Narrows. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley and delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for the base period 1959-1963.

Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 15 also shows extractions from the Colton Basin Area within San Bernardino Valley/State Water Project water during calendar years 2019-2023. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for calendar years 2019-2023.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years and then supplied revised determinations of the amounts delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The corrected determinations for calendar years 2008 through 2014 may be found in the Appendix B of the Appendices volume to the Annual Report of the Watermaster.

LOSS OF RETURN FLOW RELATED TO INCREASED DELIVERIES FROM COLTON BASIN AREA WITHIN SAN BERNARDINO VALLEY AND RIVERSIDE BASIN AREA WITHIN SAN BERNARDINO COUNTY FOR USE ON LANDS NOT WITHIN WESTERN NOR TRIBUTARY TO THE RIVERSIDE NARROWS

The next to last sentence in Paragraph X of the Judgment as amended in the 1992 Amendment provides that:

> "San Bernardino Valley shall also be obligated to provide replenishment in the Colton or Riverside Basin, as the case may be, to offset loss of return flow related to any increase over the exports therefrom within San Bernardino Valley for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster."

The last sentence in Paragraph X of the Judgment as amended in the 1992 Amendment provides that:

> "Against its replenishment obligation to offset loss of return flow related to any increase in the exports from the Colton Basin Area or Riverside Basin Area within San Bernardino Valley, San Bernardino Valley shall receive credit for that portion of direct delivered water which originated outside that Basin and which returns to the ground water of that Basin."

In Chapter VIII, the new deliveries from the San Bernardino Basin Area along with supplies of State Water Project water imported for use on lands within Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County, and resulting increased return flow related to such New Deliveries in Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County are determined.

SECTION V

USES OF WATER IMPORTED FROM THE STATE WATER PROJECT

CHAPTER IX

STATE WATER PROJECT WATER

The San Bernardino Valley Municipal Water District has a Contract with the State of California, Department of Water Resources, for a supply of water from the State Water Project. Deliveries began in December 1972. Deliveries of this imported water are made to many locations within and without San Bernardino Valley Municipal Water District's boundaries in accordance with provisions of the contract. The deliveries within the District boundary include groundwater recharge and direct deliveries for use in the Chino Basin Area within San Bernardino Valley, Colton Basin Area within San Bernardino Valley, San Bernardino Basin Area, and Yucaipa Basin Area.

Table No. 21 shows deliveries of imported water (State Water Project) in recharge categories by basin, and direct delivery categories showing inside the San Bernardino Basin Area and outside the San Bernardino Basin Area deliveries. These values are used in preparation of Table No. 17 in the Annual Report.

Table No. 22 shows deliveries of imported water and San Bernardino Basin Area groundwater to Bear Valley Mutual Water Company (BVMWC) by San Bernardino Valley pursuant to its 1996 agreement with Big Bear Municipal Water District. It is currently assumed that the sum of the imported water and groundwater deliveries equals the amount of native water not available for downstream diversion and use by BVMWC because of reduction in lake releases for local benefit. These amounts of in-lieu delivery are used in preparation of Table No. 17 in the Annual Report.

Table No. 22 was initially developed in preparation of the September 6, 2013 Annual Report and only included the direct delivery of imported water. The table was modified in the August 1, 2015 Annual Report to include pumped groundwater. The sum of imported water and groundwater was used to directly show San Bernardino Valley's obligation in Table No. 17 rather than include it as an extraction in Volume 1, Table No. 8.

INTRODUCTION

The settlement of the case of the Orange County Water District, Plaintiff, vs. City of Chino, et al., Defendants, being Case No. 117628 in the Superior Court of the State of California in and for the County of Orange, made necessary a settlement of the case of Western Municipal Water District of Riverside County, et al., vs. East San Bernardino County Water District, which was settled by Stipulated Judgment in Case No. 78426, entered in the Superior Court of the State of California in and for the County of Riverside, on April 17, 1969.

Paragraph VIII of the Judgment entitled, *Extractions from Colton Basin Area and Riverside Basin Area in San Bernardino County*, in subparagraph (d), recites as follows:

> "Extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County, for use within San Bernardino Valley, shall not be limited. However, except for any required replenishment by Western, San Bernardino Valley shall provide the water to maintain the static water levels in the area, as determined by wells numbered 1S 4W 21 Q3, 1S 4W 29 H1, and 1S 4W 29 Q1 at an average level no lower than that which existed in the Fall season of 1963. Such 1963 average water level is hereby determined to be 822.04 feet above sea level. In future years, the level shall be computed by averaging the lowest static water levels in each of the three wells occurring at or about the sametime of the year, provided that no measurements will be used which reflect the undue influence of pumping in nearby wells, or in the three wells, or pumping from

the Riverside Basin in Riverside County in excess of that determined pursuant to Paragraph IX(a) hereof.

Pursuant to the foregoing, the Watermaster has compiled all available records and data pertinent to the water surface elevation in the three key wells named in the Judgment and shown on Map No. 1. These data, including elevations through December 1971, are presented in Report of Watermaster, Volume 8 dated June 1972.

Groundwater elevations of the key wells for calendar year 2019 through 2023 are presented in this Report of Watermaster, Volume 8 – 2023. Figures 1, 2, and 3 graphically display the specific static water elevations for each key well that were used to select the lowest elevation for calendar year 2023. Figures 1A, 2A, and 3A show the lowest fall static water elevation recorded each year for each of the three wells for the current five-year period.

Table No. 1 presents the lowest static water level elevation for each well and the average low elevation for the three wells for calendar years 2019 through 2023.

The basic data compiled in Tables No. 2 through 4 at the end of this report is based on measurements of depth to water by the City of Riverside and the Watermaster. For the calendar year 2023, the average of the lowest static level in each well has been determined to be at an elevation of 847.84 feet above mean sea level (MSL). This elevation is 25.80 feet higher than the 1963 minimum (822.04 MSL) required by the Judgment. This region has experienced significantly wet 2022/2023 and 2023/2024 winter seasons and the local hydrology has had positive effects on water levels in the Colton and Riverside North Basin Areas. However, understanding the increasing variability in the frequency and quantity of precipitation in the region, the Watermaster agencies continue to work towards long-term sustainability of the basins. In addition to the Judgment-provided actions to achieve compliance, San Bernardino Valley and Western Water are working cooperatively to develop a response plan with specific actions to increase water levels in the Colton and Riverside North Basin Areas. Actions in the Plan will be triggered when the static level in the key wells falls below San Bernardino Valley's replenishment threshold in the Judgment.

Annual Notes and Observations

Volume 8

Events noted during the following years:

Data Year 2023 (May 2024)

Calendar year 2023 was an extremely above average year with the CIMIS weather station at UC Riverside reporting 13.44" of rainfall compared to the 25 year station average of 7.85" (171% of average).

Shut down on the Volume 8 well field was requested from Monday, November 6 through Friday, November 10 with the low measurement taken on November 10. Due to unforeseen circumstances two nearby wells remained in operation during the shutdown period. The Watermaster did not require a rescheduled shut down due to the high water levels measured in the key wells.

Data Year 2022 (June 2023)

Calendar year 2022 was a below average year with the CIMIS weather station at UC Riverside reporting 5.3" of rainfall compared to the 25+ year station average of 8.06" (66% of average).

Shut down on the Volume 8 well field was requested from Monday, November 14 through Sunday, November 20 with the low measurement taken on November 19.

Data Year 2021 (July 2022)

Calendar year 2021 was a below average year with the CIMIS weather station at UC Riverside reporting 7.4" of rainfall compared to the 25+ year station average of 8.20" (90% of average).

Shut down on the Volume 8 well field was requested from Monday, November 15 through Sunday, November 21 with the low measurement taken on November 21.

Data Year 2020 (July 2021)

Calendar year 2020 was an average year with the CIMIS weather station at UC Riverside reporting 8.5" of rainfall compared to the 25+ year station average of 8.23" (103% of

average).

Shut down on the Volume 8 well field was requested from Monday, November 16 through Sunday, November 22 with the low measurement taken on November 22.

Data Year 2019 (July 2020)

Calendar year 2019 was an above average year with the CIMIS weather station at UC Riverside reporting 14.5” of rainfall compared to the 25+ year station average of 8.55” (169% of average).

Shut down on the Volume 8 well field was requested from Monday, November 18 through Sunday, November 24 with the low measurement taken on November 24.
